A vertical rectangular panel with a rich, dark brown, textured surface, resembling leather or a similar material. The texture is slightly uneven with some darker and lighter patches.

BROWN

A vertical rectangular panel with a dark, almost black, textured surface. The texture is similar to the brown panel, with some subtle variations in tone and grain.

BLACK

A vertical rectangular panel with a light gray, textured surface. The texture is similar to the other panels, with some subtle variations in tone and grain.

MOON WHITE

MOON BEIGE

The image consists of three vertical panels, each showing a different textured surface. The left panel is a light grey with a fine, pebbled texture. The middle panel is a dark brown with a more pronounced, irregular texture. The right panel is a very dark, almost black, with a rough, cracked texture. Each panel has its name printed in white, uppercase letters at the bottom.

CERTIFICAZIONI DI SISTEMA

SYSTEM CERTIFICATION . ZERTIFIZIERUNG . SYSTÈME DE CERTIFICATION

SISTEMA DI GESTIONE AMBIENTALE.

Certificazione ISO 14001: è un Sistema di Gestione Ambientale, che attesta la validità delle misure adottate dall'Azienda per salvaguardare l'ambiente interno ed esterno. Con questa certificazione la nostra azienda conferma il proprio impegno nell'assicurare il rispetto delle leggi relative all'ambiente, e nel gestire, preservare e, ove possibile, diminuire l'utilizzo di risorse naturali riducendo al minimo l'inquinamento.

UMWELTSCHUTZSYSTEM ZERTIFIZIERT.

Zertifizierung nach ISO 14001: Diese Norm legt die Gültigkeit der vom Unternehmen in Bezug das Umweltmanagement angewandten Maßnahmen im und außerhalb des Werks fest. Mit dieser Zertifizierung bestätigt unser Unternehmen seinen Einsatz zur Versicherung der Berücksichtigung aller gesetzlichen Vorgaben in Bezug auf Umweltschutz und Umweltmanagement, für die Verwaltung, den Schutz und - wo möglich - einen geringeren Einsatz von natürlichen Ressourcen und somit eine.

CERTIFIED ENVIRONMENTAL MANAGEMENT SYSTEM.

ISO 14001 certification: this is an Environmental Management System, which demonstrates the validity of the measures adopted by the Company to protect the internal and external environment. Through this certification, our company confirms its commitment to ensuring observance of laws concerning the environment and to managing, preserving and, where possible, reducing the use of natural resources, minimising pollution.

GESTION ENVIRONNEMENTALE CERTIFIÉ.

Certification ISO 14001 : il s'agit d'un Système de management environnemental qui certifie la validité des mesures adoptées par l'entreprise pour protéger l'environnement intérieur et extérieur. Grâce à cette certification, notre entreprise affirme sa volonté de faire respecter les lois sur l'environnement, ainsi que de gérer, préserver et, si possible, diminuer l'exploitation de ressources naturelles en réduisant au minimum la pollution.

SISTEMA DI GESTIONE QUALITÀ.

Certificazione ISO 9001: per la gestione del sistema di Qualità aziendale. La certificazione, valida a livello internazionale, riguarda l'intera gestione aziendale, dalla ricerca e sviluppo alla produzione, dalla distribuzione all'assistenza al cliente. Questo schema certifica che l'Azienda ha implementato un sistema di controllo della qualità aziendale.

QUALITÄTSSYSTEM ZERTIFIZIERT.

Zertifizierung nach ISO 9001: für das Qualitätsmanagement-System im Unternehmen. Die international anerkannte Norm im Qualitätsmanagement regelt alle Abläufe im Unternehmen, ausgehend von Forschung und Entwicklung, über die Produktion bis zum Vertrieb und den Kundendienst. Diese Zertifizierung bezeugt, dass das Unternehmen die Anforderungen des Qualitätsmanagementsystems in Bezug auf die Produktionsqualität erfüllt.

CERTIFIED QUALITY SYSTEM.

ISO 9001 certification: for corporate Quality system management. The certification, valid at an international level, concerns corporate management in its entirety, from research and development to production, and from distribution to customer support. This system certifies that the Company has implemented an internal quality management system.

SYSTÈME QUALITÉ CERTIFIÉ.

Certification ISO 9001 : pour le management du système de qualité de l'entreprise. Valide au niveau international, la certification s'applique à l'ensemble du management de l'entreprise, de la R&D à la production, sans oublier la distribution et le service client. Ce schéma certifie que l'entreprise a mis en oeuvre un système de contrôle de la qualité de l'entreprise.

I punti di forza che sotto il profilo ambientale e qualitativo caratterizzano la produzione di FMG Fabbrica Marmi e Graniti sono:

- utilizzo di materie prime naturali a basso impatto ambientale, in quanto ampiamente diffuse sulla crosta terrestre e non a rischio di esaurimento (come invece si verifica per alcuni materiali lapidei);
- processi produttivi ad elevate performance qualitative ed ambientali, ciò grazie a fonti energetiche pulite come il gas metano per la produzione di energia termica;
- ridottissimi consumi di acqua, attraverso la creazione di impianti di trattamento e riciclo completo delle acque reflue industriali, provenienti soprattutto dai lavaggi degli impianti, e l'attivazione di un sistema di approvvigionamento di acqua industriale (acqua di fiume appositamente trattata). Tutto ciò permette una drastica riduzione dei consumi idrici, l'eliminazione di qualsiasi scarico di acque reflue e, soprattutto, un quasi inesistente utilizzo di acqua potabile;
- ciclo dei materiali chiuso: ovvero non esiste generazione di scarti durante la lavorazione, grazie al sistema di recupero ed al riutilizzo di tutti i residui adottato da FMG Fabbrica Marmi e Graniti;
- riciclaggio ottimale dei rifiuti differenziati;
- durabilità nel tempo senza particolari necessità di manutenzione, grazie alle ottime caratteristiche di igiene e di praticità dei prodotti FMG Fabbrica Marmi e Graniti;
- elevata compatibilità allo smantellamento del pavimento/rivestimento, come definito dalle attuali legislazioni. In particolare, i residui derivanti dallo smantellamento, in ragione della loro inerzia, non richiedono trattamenti particolari e possono facilmente essere riutilizzati come inerti non rilasciando alcun genere di sostanza pericolosa e non.

The salient features of FMG Fabbrica Marmi e Graniti's production, in terms of environment and quality, are as follows:

- Use of natural raw materials that ensure minimal environmental impact, being broadly available in the earth's crust and not at the risk of depletion (as in the case of various types of stone);
- Production processes of a high quality and environmental standard, using clean sources of energy such as methane gas for the production of heat energy;
- Minimal consumption of water. We use plants that treat and recycle all industrial waste water used mainly for cleaning the equipment, as well as an industrial water supply system (which uses appropriately treated river water). This serves to drastically reduce our consumption of water, eliminates virtually all disposal of waste water and, above all, ensures we do not use nearly any potable water;
- Closed work cycle: this means no waste is generated during the work phase due to FMG Fabbrica Marmi e Graniti's system that recovers and reuses all residue;
- Optimal recycling of segregated waste;
- Long-lasting durability, without any particular need for maintenance due to the excellent standards of hygiene and practicality of FMG Fabbrica Marmi e Graniti's products;
- The floor/wall tiles are designed in such a way that they can be easily taken up again, as per the law in force. In particular, any residue created when taking up the tiles does not require special treatment due to its inertia and can be easily re-used as inert matter without releasing any substances, dangerous or otherwise.

Il Sistema comunitario di ecogestione e audit (**EMAS** = Eco-Management and Audit Scheme) è uno strumento a cui possono aderire volontariamente le imprese e le organizzazioni; la nostra Azienda ha deciso di aderire ad EMAS per perseguire e rendere evidente un miglioramento costante delle proprie prestazioni ambientali, che sono rese disponibili al pubblico attraverso la dichiarazione ambientale.

Das EU-Öko-Audit (**EMAS** = Eco-Management and Audit Scheme): ist ein von der Europäischen Union entwickeltes Instrument für alle Unternehmen und Organisationen, dem unsere Firma beigetreten ist, um mit Umweltmanagement und Umweltbetriebsprüfung, die Umwelleistung des Unternehmens zu verbessern.

The EU **EMAS** (Eco-Management and Audit Scheme) is a voluntary instrument in which businesses and organisations can participate. Our Company has decided to do so in order to pursue and make visible the continuous improvement of our environmental performance, which is made available to the public through the environmental statement.

Les entreprises et organismes peuvent volontairement demander à adhérer au Système de Management Environnemental et d'Audit (**EMAS** = « Eco-Management and Audit Scheme »). Notre entreprise a décidé de faire une demande d'enregistrement afin de poursuivre et promouvoir son engagement dans l'amélioration continue de ses prestations environnementales énoncées dans la déclaration environnementale consultable par le public.

Certificazione OHSAS 18001: acronimo di Occupational Health and Safety Assessment Series. Si tratta di uno standard internazionale mirato alla valutazione del rischio attraverso un sistema di gestione della sicurezza e della salute dei lavoratori, permettendo così alle Organizzazioni un miglioramento continuo oltre al rispetto degli adempimenti legislativi.

Zertifizierung nach OHSAS 18001: Abkürzung für Occupational Health and Safety Assessment Series. Es handelt sich um eine internationale Norm zur Unterstützung der Unternehmen bei der Risikoüberwachung und Gefährdungsbeurteilung über ein Arbeitsschutzmanagementsystems zum Schutz der Gesundheit der Mitarbeiter und für eine kontinuierlichen Verbesserung des Managements und der Einhaltung der geltenden Vorschriften.

OHSAS 18001 certification: an acronym for Occupational Health and Safety Assessment Series. This is an international standard directed towards risk assessment through an occupational health and safety management system, permitting organisations to continuously improve their observance of legal requirements.

Certification OHSAS 18001 : acronyme de « Occupational Health and Safety Assessment Series ». Il s'agit d'une norme internationale visant à évaluer les risques grâce à un système de management de la sécurité et de la santé des travailleurs, permettant ainsi aux organismes de mettre en place un processus d'amélioration continue et de se conformer aux dispositions législatives.

Certificazione ISO 50001: Sistemi di Gestione dell'Energia: standard internazionale che permette, attraverso l'implementazione di un sistema di gestione dell'energia, il miglioramento continuo della propria prestazione energetica, permettendo così una riduzione dell'emissione dei gas serra oltre che dei costi energetici correlati.

Zertifizierung nach ISO 50001 - Energiemanagementsystem: internationales Normenwerk zur Unterstützung von Unternehmen bei der Einführung eines Energiemanagementsystems, bei dem ihre energiebezogene Leistung durch den Aufbau von dazu notwendigen Systemen und Prozessen verbessert wird, um so den Ausstoß von Treibhausgasen zu verringern und die damit verbundenen Energiekosten zu senken.

ISO 50001 - Energy Management Systems certification: an international standard that enables continual improvement of energy performance through the implementation of an energy management system, thus permitting a reduction in greenhouse gas emissions as well as related energy costs.

Certification ISO 50001 - Systèmes de management de l'énergie : norme internationale qui permet à une entreprise, à travers la mise en place d'un système de management de l'énergie, d'améliorer continuellement ses prestations énergétiques afin de réduire les émissions de gaz à effet de serre ainsi que les coûts énergétiques qui en découlent.

Die Stärken, welche die Produktion von FMG Fabbrica Marmi e Graniti in Hinsicht auf Umweltschutz und Qualitätsgesichtpunkte kennzeichnen, sind:

- Die Verwendung von natürlichen Rohmaterialien mit geringer Umweltbelastung, die dank ihres häufigen Vorkommens keine Gefahr der Erschöpfung laufen (wie das dagegen bei einigen Steinmaterialien der Fall ist);
- Herstellungsverfahren mit hoher Leistung in punkto Qualität und Umwelt, dies auch dank sauberer Energiequellen wie Methangas zur Erzeugung von thermischer Energie;
- Extrem geringer Wasserverbrauch dank der Einrichtung von Wiederaufbereitungsanlagen für die Behandlung und das komplette Recycling der industriellen Abwässer, die vor allem von den Waschvorgängen der Anlagen stammen, sowie die Aktivierung eines Versorgungssystems für Industrierwasser (entsprechend behandeltes Flusswasser). All dies ermöglicht eine drastische Verringerung des Wasserverbrauchs, das Entfallen jeglicher Art der Abwasserentsorgung und was wesentlich wichtiger ist, fast absolut keinen Einsatz von Trinkwasser;
- Ein geschlossener Materialzyklus: das bedeutet, dass dank des von FMG Fabbrica Marmi e Graniti eingesetzten Wiedergewinnungs- und Wiederverwertungssystems sämtlicher Rückstände während der Verarbeitung keine Abfälle erzeugt werden;
- Optimale Wiederverwertung der getrennten Abfälle;
- Eine zeitlose Dauerhaftigkeit ohne besondere Wartungsmaßnahmen dank der optimalen hygienischen Eigenschaften und der Zweckmäßigkeit der Produkte von FMG Fabbrica Marmi e Graniti;
- Hohe Abrissverträglichkeit des Bodenbelags/der Wandverkleidung, so wie es die derzeitige Gesetzgebung verlangt. Insbesondere erfordern die Abrissrückstände keine besonderen Behandlungsverfahren und können leicht als inerte Stoffe wieder verwendet werden, da sie keine Art von Gefahrenstoffen beinhalten oder freigeben.

Les points forts qui sous le profil environnemental et qualitatif caractérisent la production de FMG Fabbrica Marmi e Graniti sont:

- utilisation de matières premières naturelles à faible impact environnemental, largement répandues sur l'écorce terrestre et qui ne risquent pas de s'épuiser (comme cela est au contraire le cas pour certains matériaux lapidaires);
- processus de production ayant des performances qualitatives et environnementales élevées, grâce à des sources énergétiques propres comme le gaz méthane pour la production d'énergie thermique;
- consommation d'eau extrêmement réduite, grâce à la création d'installations de traitement et de recyclage complet des eaux usées, provenant surtout des lavages des installations, et l'activation d'un système d'approvisionnement d'eau industrielle (eau de fleuve correctement traitée). Tout ceci permet une réduction importante des consommations hydriques, l'élimination des évacuations d'eaux usées et, surtout, une utilisation presque inexistante d'eau potable ;
- cycle fermé des matériaux : c'est-à-dire lorsqu'il n'y a pas de déchets générés au cours de la fabrication, grâce au système de recyclage et d'utilisation de l'ensemble des rebuts, adopté par FMG Fabbrica Marmi e Graniti;
- recyclage optimal des déchets différenciés;
- durabilité dans le temps, sans aucun entretien, grâce aux excellentes propriétés d'hygiène et d'utilisation des produits de FMG Fabbrica Marmi e Graniti;
- excellente compatibilité au moment de la destruction des dalles/revêtements telle que préconisée par les législations actuelles. Notamment pour les déchets provenant de la destruction, en raison de leur inertie, qui ne demandent aucun traitement particulier et qui peuvent être facilement réutilisés en tant qu'inertes qui ne génèrent aucune substance dangereuse.

CERTIFICAZIONI DI PRODOTTO

PRODUCT CERTIFICATIONS . PRODUKTPRÜFBERICHTE . CERTIFICATIONS DE PRODUIT

View certified
our products on
<https://spot.ul.com/>

Certificazione GREENGUARD: assicura che i prodotti destinati all'uso in ambienti interni siano caratterizzati dalla pressoché inesistente emissione di sostanze volatili, contribuendo alla creazione di ambienti più salutarci. La GREENGUARD Gold Certification prende in considerazione fattori di sicurezza che tengono conto di soggetti sensibili (come i bambini e gli anziani) e assicura che l'impiego di un prodotto sia accettabile in ambienti come scuole e strutture sanitarie. Tale certificazione è ampiamente riconosciuta e accettata dai programmi di edilizia sostenibile e dai regolamenti edilizi in tutto il mondo. Negli Stati Uniti, essa viene presa come riferimento dei sistemi di valutazione degli edifici CHPS (The Collaborative for High Performance Schools) e LEED (Leadership in Energy and Environmental Design). Le collezioni certificate sono consultabili al sito web <https://spot.ul.com/>

Die GREENGUARD-Zertifizierung gewährleistet, dass ein für den Innenbereich bestimmtes Produkt die strengsten und umfassendsten Anforderungen an Emissionen flüchtiger organischer Verbindungen (VOCs) in die Raumluft erfüllt, was für eine gesunde Umgebung sehr wichtig ist. Die GREENGUARD Gold-Zertifizierung berücksichtigt strengere Zertifizierungskriterien, welche die Sicherheit sensiblerer Menschen wie Kinder oder Senioren stärker berücksichtigen sowie sicherstellen, dass ein Produkt zur Verwendung zum Beispiel in Schulen oder Gesundheitseinrichtungen geeignet ist. Die Zertifizierung wird weltweit von zahlreichen Zertifizierungsprogrammen für nachhaltige Bauwerke und Baureglemente anerkannt. In den Vereinigten Staaten wird sie als Referenz in Bewertungssystemen von CHPS- (The Collaborative for High Performance Schools) und LEED-Gebäuden (Leadership in Energy and Environmental Design) eingesetzt. Zertifizierte Kollektionen sind auf <https://spot.ul.com/Website>

GREENGUARD Certification ensures that products intended for indoor use are characterised by practically non-existent emissions of volatile substances, contributing to the creation of healthier environments. GREENGUARD Gold Certification considers safety factors to account for sensitive individuals (such as children and the elderly), and ensures that a product is acceptable for use in environments such as schools and healthcare facilities. This certification is widely recognised and accepted by sustainable building programmes and housing regulations worldwide. In the United States, it is referenced by The Collaborative for High Performance Schools (CHPS) and the Leadership in Energy and Environmental Design (LEED) building rating systems. Certified collections are available at <https://spot.ul.com/>

La certification GREENGUARD garantit que les produits destinés à un usage intérieur émettent le moins de substances volatiles possible, contribuant ainsi à créer des intérieurs plus sains. La certification GREENGUARD Gold englobe des facteurs de sécurité tenant compte des sujets sensibles (comme les enfants et les personnes âgées) et assure que l'utilisation d'un produit soit possible dans des intérieurs tels que les écoles et les installations sanitaires. Cette certification est largement reconnue et acceptée par les programmes de construction durable et par les réglementations du bâtiment dans le monde entier. Aux États-Unis, elle sert de référence aux systèmes d'évaluation CHPS (« The Collaborative for High Performance Schools ») et LEED (« Leadership in Energy and Environmental Design ») dans le domaine du bâtiment. Collections certifiées sont disponibles sur le site Web de <https://spot.ul.com/>

Certificazione LEED: già diffusa ed attiva in oltre 40 Paesi, il sistema di certificazione Leed (Leadership in Energy and Environmental Design) valuta ed attesta la sostenibilità ambientale, sociale ed economica degli edifici considerati nel loro complesso. Secondo i criteri di classificazione LEED, i materiali da costruzione con elevata ecosostenibilità contribuiscono all'ottenimento dei crediti elevando il punteggio dell'edificio. Si certifica che tutte le lastre presentate in questo strumento contengono una percentuale di materiale riciclato superiore al 40% in accordo alla norma ISO 14021, garantendo quindi i più alti punteggi secondo il sistema LEED. La lista aggiornata delle collezioni certificate è disponibile al sito internet www.irisfmg.it

LEED-Zertifizierung: Das bereits in mehr als 40 Ländern präsen- te und aktive Zertifizierungssystem LEED (Leadership in Energy and Environmental Design) prüft und bestätigt die umweltfreundliche, soziale und ökonomische Nachhaltigkeit der Bauten in ihrer Gesamtheit. Den Klassifizierungskriterien von LEED entsprechend tragen hochrangig ökonachhaltige Baumaterialien dazu bei, Pluspunkte für das Gebäude zu sammeln. Es wird bestätigt, dass die in diesem Instrument vorgelegten Platten einen Prozentsatz von mehr als 40 % an wiederverwerteter Mischung gemäß Norm ISO 14021 enthalten: Sie gewährleisten also nach dem LEED-System die höchsten Punktezahlen. Die aktualisierte Liste der zertifizierten Sammlungen zur Verfügung Website www.irisfmg.it

LEED Certification: already widespread and active in more than 40 countries, the LEED (Leadership in Energy and Environmental Design) certification system assesses and attests to the environmental, social and economic sustainability of buildings considered as a whole. According to the LEED classification criteria, highly environmentally sustainable construction materials contribute to achieving credits and increasing the points for the building. All the slabs presented in this instrument are certified to contain percentage of recycled material higher than 40% in accordance with the ISO 14021 standard, thus guaranteeing the highest points according to the LEED system. The updated list of certified collections is available at www.irisfmg.it

Certification LEED: déjà présent et actif dans plus de 40 pays, le système de certification LEED (« Leadership in Energy and Environmental Design »), évalue et garantit la durabilité environnementale, sociale et économique des bâtiments dans leur globalité. D'après les critères de classement LEED, les matériaux de construction extrêmement durables d'un point de vue écologique permettent d'obtenir des crédits augmentant la note du bâtiment. Nous certifions que toutes les plaques présentées dans ce dispositif contiennent un pourcentage de matériaux recyclés supérieur à 40 % conformément à la norme ISO 14021, garantissant ainsi les meilleures notes calculées d'après le système LEED. La liste mise à jour des collections certifiées est disponible sur le site www.irisfmg.it

Certificazione BREEAM: è tra i più diffusi standard al mondo ed è volto a misurare l'impatto ambientale degli edifici mediante l'applicazione di specifici criteri di valutazione della sostenibilità della costruzione. Il sistema di assegnazione del punteggio prevede tipologie di certificazione fissati da rigorosi parametri tecnici e di controllo qualità basati sulle più recenti tecnologie e conoscenze disponibili.

BREEAM-Zertifizierung: sie gehört zu den weltweit am meisten verbreiteten Standards und dient dazu, die Umweltbelastung der Gebäude mit speziellen Beurteilungskriterien der Nachhaltigkeit des Baus zu bemessen. Die Zuerkennung der Punktbewertung sieht Zertifizierungen vor, die nach strengen, auf den neuesten Technologien und Erkenntnissen aufbauenden Maßstäben von Technik und Qualitätskontrolle festgelegt sind.

BREEAM Certification: it is the most widespread standard in the world and it is designed to measure the environmental impact of buildings by applying specific criteria for assessing the sustainability of the construction. The rating system requires types of certification determined by strict technical parameters and quality control which in turn are based on the most recent technology and knowledge available.

Certification BREEAM: c'est l'une des normes les plus répandues au monde et elle permet de mesurer l'impact environnemental des bâtiments selon des critères précis d'évaluation de la durabilité de la construction. Le système d'attribution du score prévoit des types de certification établis selon des paramètres techniques rigoureux et des contrôles qualité basés sur technologies et les connaissances disponibles les plus récentes.

EPD (Environmental Product Declaration): dichiarazione ambientale di prodotto di tipo III effettuata su base volontaria, che si basa sull'analisi del ciclo di vita del prodotto (secondo l'approccio "dalla culla al cancello") in accordo alla norma EN 15804. La presente dichiarazione viene redatta facendo riferimento alle linee guida delle norme UNI EN ISO 14040 e alle regole specifiche per la categoria di prodotto PCR (Product Category Rules). Tale documento descrive gli impatti ambientali legati alla produzione di una specifica quantità di prodotto delle diverse fasi, dall'estrazione delle materie prime, al trasporto, fino alla fase produttiva vera e propria. La nostra Azienda è stata la prima a certificare i propri prodotti (vedi www.environdec.com) con una EPD specifica di prodotto, convalidata da un Ente terzo indipendente. Registrazione n. S-P-01439 consultabile al sito internet www.environdec.com

EPD (Environmental Product Declaration): Es handelt sich um eine freiwillige Umweltschutzerklärung für Produkte des Typs III, welche auf einer Analyse des Lebenszyklusses des Produkts basiert (nach dem Prinzip von der Wiege bis zur Bahre) gemäß Norm EN 15804. Diese Erklärung bezieht sich auf die Richtlinien der Norm UNI EN ISO 14040 und auf die spezifischen Regeln für die Produktkategorie PCR (Product Category Rules). Das Dokument beschreibt die Umweltverträglichkeit der Produktion eines gewissen Produkts im Laufe der verschiedenen Abläufe, ausgehend von der Gewinnung der Rohstoffe bis zur effektiven Produktion. Unser Unternehmen war das erste Unternehmen, das Produkte mit einer spezifischen Produkt-EPD durch eine unabhängige Außenstellen zertifizieren lassen hat (siehe www.environdec.com). Aufnahmen. S-S-P-01439 auf dem Internet zugegriffen www.environdec.com

EPD (Environmental Product Declaration): a voluntary type III product declaration, based on analysis of the product life cycle (with a "from cradle to gate" approach) in accordance with the EN 15804 standard. This declaration is drawn up with reference to the guidelines of the UNI EN ISO 14040 standard and the specific PCR (Product Category Rules). This document describes the environmental impact linked to the production of a specific quantity of product in its various stages, from extraction of the raw material and transport to the production phase proper. Our Company was the first to certify its products (see www.environdec.com) with specific EPD, validated by an independent third-party Body. Recording no. S-P-01439 can be found on the website www.environdec.com

EPD (Environmental Product Declaration) : déclaration environnementale concernant les produits de type III faite volontairement, qui se base sur l'analyse du cycle de vie du produit (selon l'approche « de l'extraction à la fin de vie »), conformément à la norme EN 15804. La présente déclaration a été rédigée en suivant les lignes directrices des normes UNI EN ISO 14040 et les règles spécifiques pour la catégorie de produits PCR (Product Category Rules). Ce document décrit les impacts environnementaux liés à la production d'une quantité spécifique de produit lors des différentes phases : de l'extraction des matières premières, en passant par le transport et jusqu'à la phase de production à proprement parler. Notre entreprise a été la première à faire certifier ses produits (consultez le site www.environdec.com) avec une EPD spécifique de produit, validée par un organisme tiers indépendant. Enregistrement. S-S-P-01439 accessibles sur Internet www.environdec.com

which models are NSF
Certified

La certificazione NSF/ANSI 51 – 2014 - Food Equipment Materials (Materiali per Attrezzature Alimentari): è stata sviluppata principalmente per le applicazioni commerciali quindi anche bar, ristoranti, cucine di hotel, mense, ecc. Le lastre ceramiche trovano applicazione nelle zone potenzialmente soggette a spruzzi o particelle di cibo (ad esempio alzatine, pareti, tavoli dove i clienti consumano cibi o bevande). Tale certificazione garantisce i più elevati standard di qualità e sicurezza per i consumatori nel caso dei prodotti certificati.

Die Zertifizierung NSF/ANSI 51 – 2014 - Food Equipment Materials (Lebensmittelechte Materialien) wurde insbesondere für den Einsatz der Materialien in gewerblichen Umgebungen wie Cafés, Restaurants, Großküchen und Kantinen entworfen. Die keramischen Platten kommen in Umgebungen zum Einsatz, die potenziell mit genießbaren Flüssigkeiten oder mit Lebensmittelteilen in Kontakt geraten könnten (wie beispielsweise Wandleisten, Wände oder Tische, an denen Kunden Nahrung oder Getränke verzehren). Diese Zertifizierung gewährleistet höchste Qualitäts- und Sicherheitsstandards für die Verbraucher beim Einsatz von zertifizierten Produkten.

NSF/ANSI 51 – 2014 - Food Equipment Materials certification was developed principally for commercial applications, so also bars, restaurants, hotel kitchens, canteens, etc. The ceramic slabs are applied in areas potentially subject to splashes or small pieces of food (e.g. stands, walls, tables where customers consume food and drink). This certification guarantees the highest quality and safety standard for consumers in the case of certified products.

La certification NSF/ANSI 51 - 2014 - « Food Equipment Materials » (Matériaux pour les installations alimentaires) a été principalement développée pour les activités commerciales, y compris les bars, restaurants, cuisines d'hôtel, cantines etc. Les plaques en céramique sont installées dans des zones potentiellement exposées aux éclaboussures de liquides ou d'aliments (par exemple, vaisseliers, murs, tables où les clients consomment des aliments ou des boissons). Cette certification garantit aux consommateurs l'application des normes les plus strictes en matière de qualité et de sécurité pour les produits certifiés.
